Notes and Filing Instructions

Remove pages 3 and 4 dated 3 April 1963

Insert pages 3 and 4 dated 27 May 1963

- b. P_2 = output unit (may have the following values: 2-13 and 16-19; 13 = printer).
 - c. P_3 through P_n are names of routines for which correctors are to be listed.
2. All parameters are optional according to the following rules:
- a. If P_1 is omitted, P_2 must also be omitted.
 - 1) Input tape will be logical tape one.
 - 2) Output unit will be the printer.
 - b. If P_2 is omitted, the output unit will be the printer.
 - c. If no routine names are specified, every routine on the tape will have its correctors listed.
 - d. If routine names are specified, only those specified will have their correctors listed.
3. The total number of parameters may not exceed the maximum number allowed by MTCII; at present 100 parameters are allowed.

D. Error Conditions

- 1. If either the input tape parameter or output unit parameter is illegal, or the two are equal, a message explaining the illegal condition is output on the typewriter and a return is made to MTCII.
- 2. A parity error will cause at most four (4) rereads. If the read is still not successful, the word PARITY is typed out, the routine name and identification on the listing is followed by PARITY ERROR, THIS RECORD SKIPPED, and the next record is processed.
